Top-30 airports according to the total annual passengers handled in 2008

Comments

Definition of “Passengers carried”

All passengers on a particular flight counted once only and not repeatedly on each individual stage of that flight. This excludes direct transit passengers.

Exclusion of double counting

The national transport (included in the total transport at country level) and the intra-EU transport aggregates (included in the total transport at EU level) have been calculated excluding double counting.

Notes on some Reporting Countries

Denmark: Data for 2009 are currently being investigated and are not included in the elements presented in this publication. However, total transport at EU level includes intra-EU passengers handled at Danish airports as provided in the declarations of EU partner airports.

Portugal: No data available for Lajes airport in 2009.

Turkey: No data available for 2009.

Iceland: No data available for 2009.

Norway: No data available for 2009.

Legend

The symbol “.” stands for “data not available”
