Energy

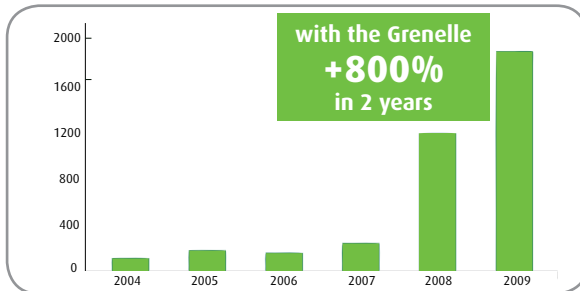

Photovoltaic solar electricity: total power

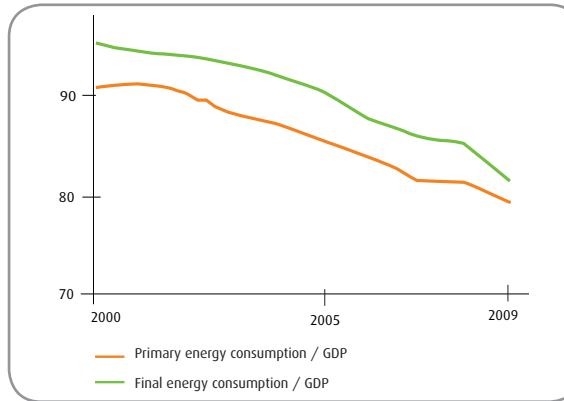

Electricity generated from wind power: total power

Accumulated evolution of the number of Bilan Carbone® (carbon assessment) carried out

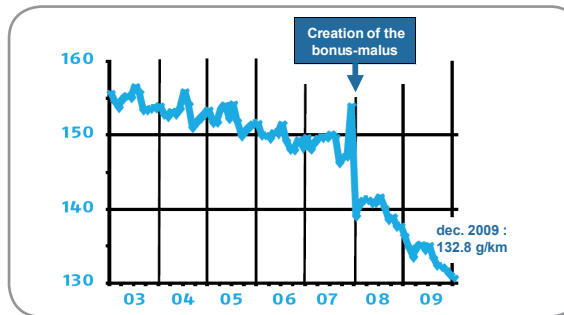

Evolution of the energy intensity

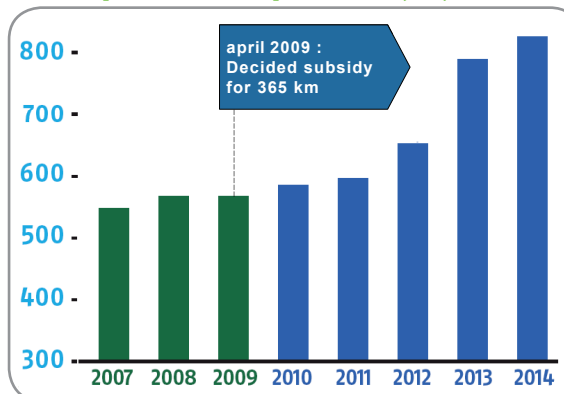

Transport

Bonus-malus: evolution of CO₂ emissions in g/km of new vehicles

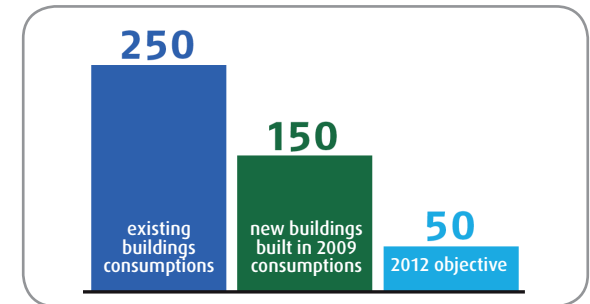

Subway and tramway network (km)

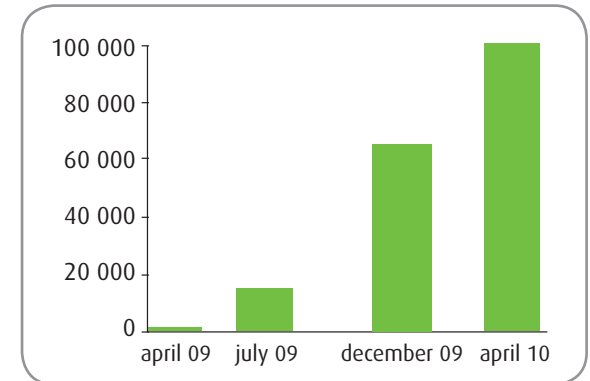

Building industry

Evolution of buildings consumption (in kWh/m²/year)

Number of interest-free green loans

Part of renewable energies heating in new detached houses (%)
